Abstract:

3D laser scanning has become more popular in today's world, there are many different applications driving to use 3D laser scanning. 3D laser scanner can be a multi-sensor which brings you multi-purpose add-value benefit. Because of the rapid development of technology, the operation of the 3D laser scanner becomes more user-friendly, time-saving and accurate. Even it can be function as a traditional surveying instrument for the monitoring and civil engineering purposes.

Mr. Henry Kwok, who is the Product Manager of TLS & GIS in Leica Geosystems Ltd. in Hong Kong now, responds to the sales and project solutions related to Terrestrial Laser Scanner. More than eight years working experience in 3D laser scanning, he would like to share some of interesting 3D laser scanning projects that showing how to transform the point cloud data into the meaningful information to meet the clients' expectations.
